

## Easy Access to Permit and License Verification

Anyone wanting to verify a boiler, electrical, mechanical or plumbing license, or check the status of a permit can access the information, anytime, on line through the Bureau of Construction Codes and Fire Safety's (BCCFS) VelocityHall 'Permit Manager.'

Users need a license number to check the status of the license or if checking the status of a permit - the street address, permit number, or license number of the contractor.

Located on the BCCFS web site – [www.michigan.gov/bccfs](http://www.michigan.gov/bccfs) - through the Quick Link "Online Permitting," on the right hand navigation bar, users can scroll to the bottom of the page and select "Check/Research Permits" feature.

Users interested in checking the status of a permit can search by address, permit number or license number of the contractor.

Select "By Address" to search a permit by job location, select "By Permit Number" to search by a permit number, or select "By License Number" to search for all permits issued to a specific contractor.

Users interested in checking the status of a license must select "By License Number."
